The larval form is found inside the hydatid cyst. It is found in the secondary host, i.e. sheep. Hydatid cyst contain scolex of future adult worm. On entering into primary host that is dog, scolex develops into adult worm.

Symptoms

- > Jaundice may caused
- > Infection on bone
- > Infection on kidney
- > Infection on eyes

Treatment

- > Praziquantol
- > Dichlorophen

Preventive measures

- > Personal hygiene
- > Wash hand after playing with dog.
- > Periodic testing and de-worming of dogs.
